

# B.S. IN ELECTRONICS ENGINEERING

## IE at Tec

- Direct connection with current industry issues
- Connection with the latest technological advancements

## Study abroad

- Universidad de Barcelona

## Strategic partners

- Yazaki
- National Instruments
- Universidad de Barcelona
- Europractice

## Electronics engineering today

- By 2024 there will be 11 billion smart devices in the world
- Mexico needs 30,000 electronic engineers every year
- By 2030, autonomous and electric vehicles will be the most common form of transportation

## Specialize

- Automotive Electronics Technology
- Embedded Systems - Development of Electronic Systems for Specific Applications
- Smart Grids

## Your future

- Development of smart electronic devices
- Design of telecommunications systems
  - Consulting
  - Research centers

**Did you know that...** by 2025 the estimated investment in telecommunications in Mexico will be more than 150 billion pesos?
